### Module C (for those who want to train others) individually designed

An a first level (Mod C1) participants are trained to train Module A. Preparations are in theory and praxis and usually conducted with single or very few participants. On a second level (Mod C2) participants are trained to train Module B.

A research topic needs to be worked out by the participants either alone or in a team.

Module C allows to actively participate in sound therapy development within our family and engages in mastering the Art of Healing with Singing Bowls.

Costs are mainly covering arising costs and is only suitable for experienced sound theapists utilizing our techniques.
